PROJECT

BBSCART

At BBSCART, I serve as a Full-Stack Developer leveraging the MERN stack (MongoDB, Express.js, React.js, Node.js) to design, develop, and maintain mission-critical applications, including:

- POS System
- BBSCART E-Delivery App
- CRM (Commission R Management)
- BBSCART Thai (localised platform)

Recipe Management (MERN Stack)

- A dynamic web application enabling users to view, add, edit, and delete recipes, offering a seamless and interactive platform for managing and exploring culinary creations.

Television Streaming App

- Developed a feature-streaming platform allowing users to watch live and on-demand TV shows.

My Portfolio

- Developed dynamic and responsive web applications using React.js to enhance user experience and performance.
- Implemented React Router for seamless and efficient client-side navigation and routing.
